SPANer – REGISTRATION

At the link below you will find a new version of ArcelorMittal Construction's software to help you select the profiled sheets we offer. The programme runs in your browser without requiring you to install anything on your computer. It is therefore possible, once you have created an account, to open it on any computer or even your mobile - wherever you need it. All you need is internet access

<https://arcelormittal.spaner.pl/>

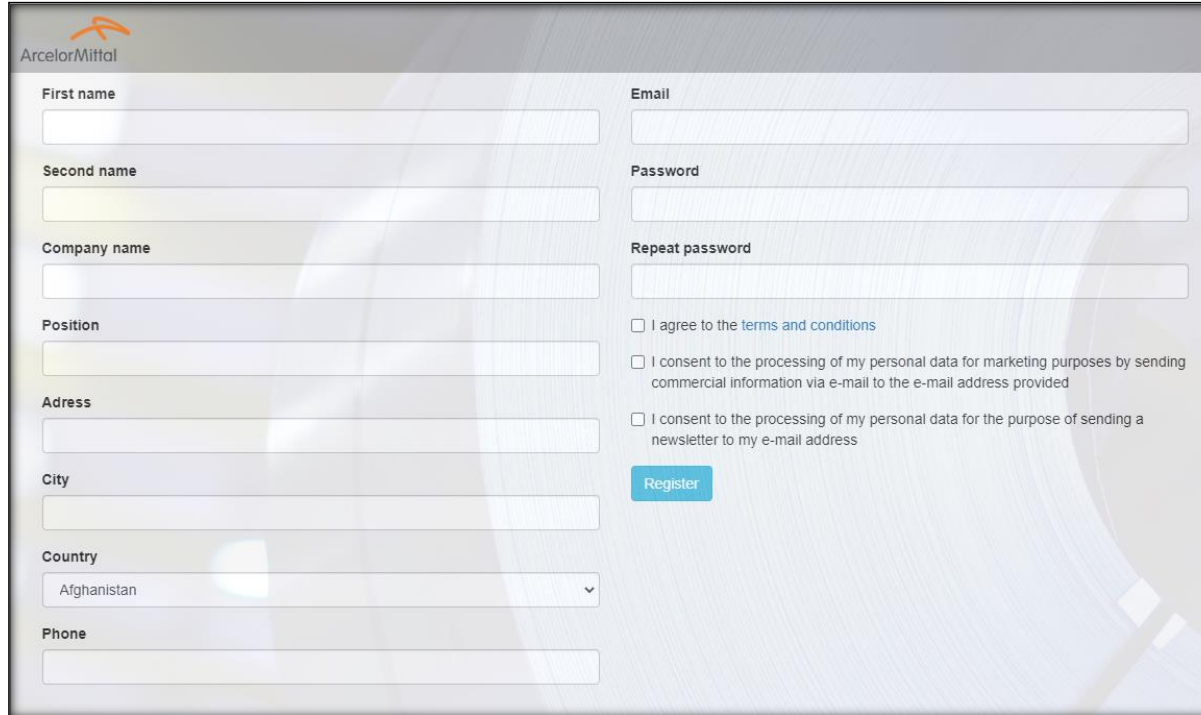

The screenshot shows the registration page for ArcelorMittal's SPANer software. At the top left is the ArcelorMittal logo. The main content area contains a registration form with the following elements:

- Email:** A text input field with the placeholder text "Email".
- Password:** A text input field with the placeholder text "Password".
- Remember me on this device
- Using the program accept the [Terms](#)
- Register:** A blue button with a pencil icon and the text "Register".
- Log in:** A green button with a person icon and the text "Log in".
- [Forgot your password?](#) link at the bottom left.

On the right side of the form, there is a message: "Don't have an account yet? Fill the registration form, and We will send you your login details."

SPANer – REGISTRATION

Registering is very simple, it just comes down to entering your basic data. In practice it should take no more than 2 minutes.

The screenshot shows the ArcelorMittal registration form. It includes the following fields and options:

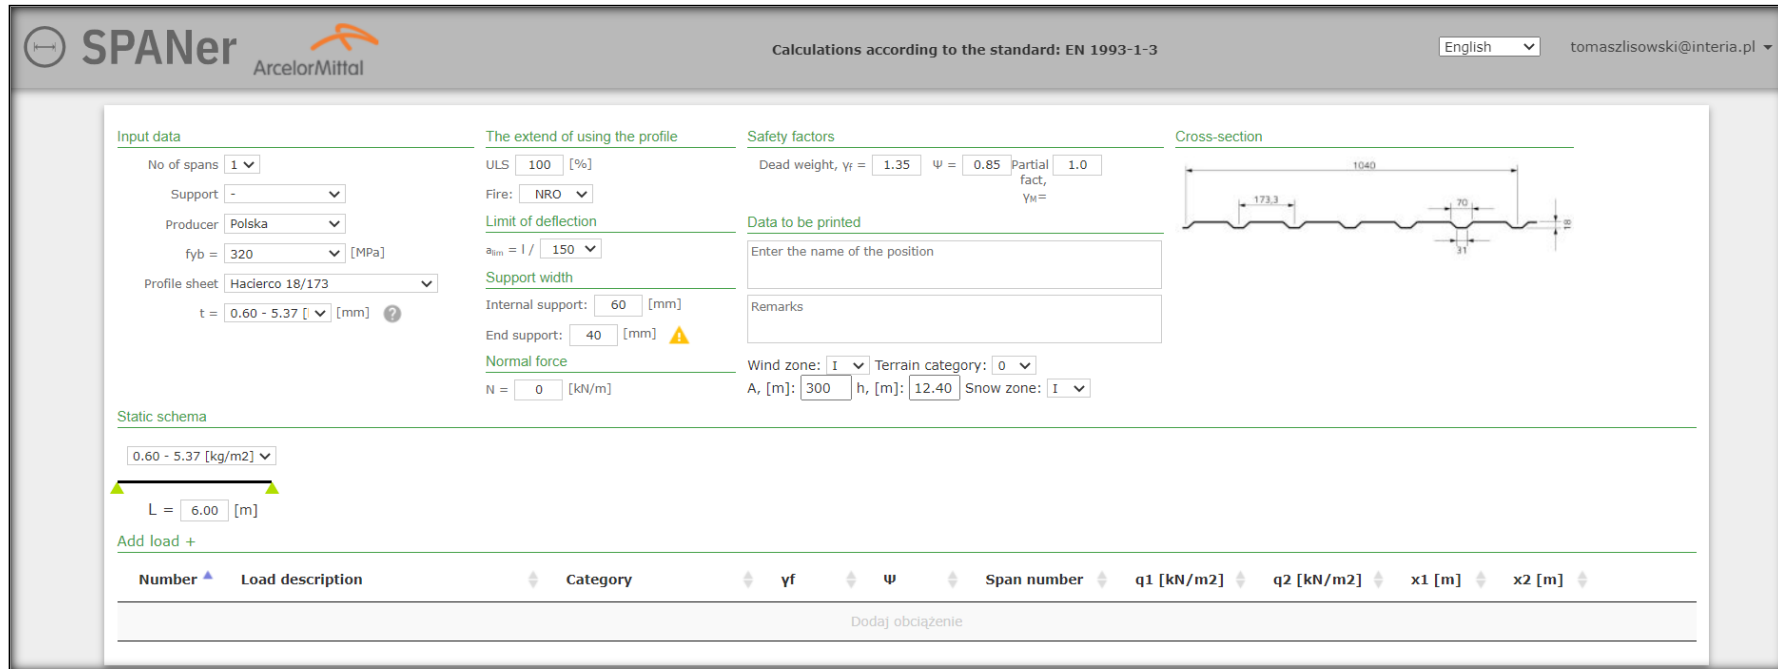

- First name
- Second name
- Company name
- Position
- Address
- City
- Country (dropdown menu, currently set to Afghanistan)
- Phone
- Email
- Password
- Repeat password
- I agree to the [terms and conditions](#)
- I consent to the processing of my personal data for marketing purposes by sending commercial information via e-mail to the e-mail address provided
- I consent to the processing of my personal data for the purpose of sending a newsletter to my e-mail address
- Register button

In response, a confirmation link will be sent to the email address indicated during registration.

Important to click confirmation within 1 hour !

SPANer – REGISTRATION

Now, using the email and password used during registration, you can log in on any device, anywhere, anytime. All you need is access to the internet.

The screenshot displays the SPANer web application interface. At the top, it shows the ArcelorMittal logo and the text "Calculations according to the standard: EN 1993-1-3". The user interface is divided into several sections:

- Input data:** Includes fields for "No of spans" (set to 1), "Support", "Producer" (Polska), "fyb" (320 MPa), "Profile sheet" (Hacierco 18/173), and "t" (0.60 - 5.37 mm).
- The extend of using the profile:** Includes "ULS" (100%), "Fire" (NRO), "Limit of deflection" (150), and "Support width" (Internal: 60 mm, End: 40 mm).
- Safety factors:** Includes "Dead weight, $\gamma_f = 1.35$ ", " $\Psi = 0.85$ ", and "Partial fact, $\gamma_M = 1.0$ ".
- Cross-section:** Shows a technical drawing of a steel profile with dimensions: total width 1040 mm, flange width 173.3 mm, web thickness 31 mm, and a depth of 70 mm.
- Data to be printed:** Includes a field for "Enter the name of the position" and "Remarks".
- Normal force:** Includes "N = 0 (kN/m)".
- Wind zone:** Includes "Wind zone: I", "Terrain category: 0", "A, [m]: 300", "h, [m]: 12.40", and "Snow zone: I".
- Static schema:** Shows a load distribution diagram with a load of "0.60 - 5.37 [kg/m²]" and a span length "L = 6.00 [m]".
- Add load +:** A section for adding additional loads.
- Table:** A table with columns: "Number", "Load description", "Category", " γ_f ", " Ψ ", "Span number", "q1 [kN/m²]", "q2 [kN/m²]", "x1 [m]", and "x2 [m]". Below the table is a button "Dodaj obciążenie".

Due to the programme's placement in the internet, in addition to the advantages previously indicated, we are able to keep our product database up-to-date and continuously expand our programme with new functionalities.

SPANer – REGISTRATION

We encourage you to use our programme free of charge. Should you have any problems, our technical team will be happy to clarify any doubts.

We are constantly developing our software. We believe that the accessibility, intuitiveness, functionality and clarity of SPANer will make your work easier and enable you to make the best possible selection of the profiled sheets offered by ArcelorMittal Constuction.
